

TimeWiseHub — User Guide

Getting started: navigating the site and understanding your role

What Is TimeWiseHub?

TimeWiseHub is a business management platform for freelancers and small teams. It brings together time tracking, expense management, invoicing, project management, leave, and team chat — all in one place, so you are not jumping between separate tools.

It works in two modes:

- **Solo** — a single user (freelancer or consultant) managing their own clients, time, and invoices.
- **Organisation** — a company account with a team of members, where each person is assigned a role that controls what they can see and do.

Navigating the App

Once you sign in, the **left-hand sidebar** is your main navigation. It is divided into sections:

Section	What's in it
Home	Your dashboard — assigned tasks, task pool (managers only)
Delivery	Clients, Calendar, Time Tracking
Communication	Chat, AI Assistant
Money	Invoices, Expenses, Finance
People	Leave Management
Insights	Analytics, Activity Log, Data Export
Bottom of sidebar	Billing, Download Desktop App, Settings

Key Concepts

Before reading about roles, it helps to understand these core building blocks of the app:

Clients, Projects and Tasks

- **Clients** are the companies or people you do work for. Projects sit inside clients.
- **Projects** represent a piece of work for a client. They have a due date and contain tasks.

- **Tasks** are individual to-do items inside a project. Each task has a priority (Urgent, High, Normal, or Low), a status (To Do → In Progress → Done), and can be assigned to a team member.

Time and Money

- **Time Entries** are logged work sessions. You can start a timer or manually enter a start and end time.
- **Timesheets** are a weekly summary of your logged hours. You submit them to your manager for approval at the end of each week.
- **Expenses** are business costs you record with an amount, category, date, and optional receipt. You submit them for manager approval.
- **Invoices** are bills you send to clients, with line items, a due date, and your payment details.

People and Communication

- **Leave Requests** are time-off requests submitted for manager approval. You can view your own leave balance per type (annual, sick, etc.).
- **Chat** supports direct messages between any two team members, plus a Team Announcements channel that managers and owners can post to (employees can read it but not post).

The Three Roles

Every team member is assigned one of three roles: **Owner**, **Manager**, or **Employee**. Your role determines what you can see and do throughout the app. These restrictions are enforced at the database level, not just in the interface — meaning you cannot access another person's data by navigating directly to a URL.

Owner

The Owner created the organisation account and has full, unrestricted access to everything. There is only one Owner per organisation.

Team management

- Invite new team members by email — they receive a secure link to join.
- Change any member's role (manager ↔ employee).
- Remove members from the organisation.

Financial access

- View the full Company Profit and Loss report — total revenue versus expenses, broken down by month or year.
- See each client's outstanding and paid invoice totals.
- Create, send, and manage all invoices.
- Set the organisation's invoice letterhead and payment details (bank account, BSB, PayID).

Approval workflows

- Approve or reject employee timesheets, with an optional written note.

- Approve or reject employee expenses, with an optional written note.
- Approve or reject leave requests.

Projects and tasks

- Create, edit, and archive organisation-level projects and clients.
- Assign tasks to any team member or leave them unassigned (unassigned tasks appear in the Task Pool on the home dashboard).

Communication

- Post in the Team Announcements channel.
- Direct message any team member.

How to invite someone: Go to Settings → Team Members → Invite Member. Enter their email address and role. They will receive an email with a link to create their account and join the organisation.

Manager

A Manager is a team lead or supervisor. They have everything an Employee has, plus the ability to see and act on their team's work. They do not have access to the company P&L or client invoice totals — those are Owner-only.

Task Pool (Home Dashboard)

- A Task Pool section appears on the home dashboard showing all unassigned tasks from organisation projects.
- Click **Claim** to assign a task to yourself, or **Assign** to pick any team member.
- The assigned person receives a notification and the task appears in their My Work list.

Timesheet review

- The Time Tracking page shows a Team Hours panel — how many hours each employee has logged today and this week.
- When employees submit their weekly timesheet, it appears here for review. You can **Approve** or **Reject** it with an optional note. The employee is notified either way.

Expense review

- The Expenses page shows all team expenses with a status of Submitted.
- You can **Approve** or **Reject** each one with an optional note. The employee is notified automatically.

Leave approval

- The Leave page shows all pending leave requests from team members.
- You can approve or reject each request with an optional note. The employee is notified automatically.

Finance view

Instead of the company P&L, Managers see a **Team Approvals** summary — a dashboard showing pending timesheets and expenses that need their attention.

Communication

- Post in the Team Announcements channel.
- Direct message any team member.

Employee

An Employee is a regular team member. They manage their own work and submit things to their manager for approval. They can only see their own data — they cannot view other people's time entries, expenses, tasks, or leave.

Home Dashboard

- Sees a **My Work** list showing tasks assigned to them that are not yet done.
- Does not see the Task Pool — that is for managers only.

Time Tracking

- Log time manually or use the built-in timer (start, pause, stop).
- View a summary of their own hours logged today and this week.
- At the end of the week, click **Submit Timesheet** to send it to their manager.
- If the timesheet is rejected, the manager's note explains why — correct and resubmit.

Expenses

- Create an expense with amount, category, date, and an optional receipt photo or PDF.
- Submit it for manager approval.
- Track the approval status in the expenses list. A notification arrives when it is actioned.

Leave Requests

- Submit a leave request with leave type, start date, end date, and a half-day option.
- View their own leave balance (entitled days versus days taken) per type per year.
- A notification arrives when the manager approves or rejects the request.

Projects and Tasks

- View all organisation projects and their tasks.
- Can create tasks within projects, but cannot create new organisation-level projects or clients.

Chat

- Direct message any team member.
- Read the Team Announcements channel, but cannot post there.

Finance and Invoices

- Sees their own personal financial summary (their submitted expenses and logged hours).
- Can view invoices but cannot create or send them.

AI Assistant

- Can ask questions about their own data in plain English — for example, "What tasks do I have due this week?" or "Log 2 hours on the Acme project today."
- The assistant always shows a confirmation step before creating or changing anything.

Role Comparison

Feature	Employee	Manager	Owner
My Work (home dashboard)	Own tasks only	Own tasks	Own tasks
Task Pool (home dashboard)	—	Claim and assign	Claim and assign
View clients	Yes	Yes	Yes
Create / edit clients	—	—	Yes
View projects	Yes	Yes	Yes
Create / archive projects	—	—	Yes
Log own time	Yes	Yes	Yes
View team hours	—	Yes	Yes
Approve timesheets	—	Yes	Yes
Submit own expenses	Yes	Yes	Yes
Approve team expenses	—	Yes	Yes
Finance view	Own summary only	Team approvals dashboard	Full company P&L
Create and send invoices	—	—	Yes
Submit own leave	Yes	Yes	Yes
Approve team leave	—	Yes	Yes
Post in Team Announcements	Read only	Yes	Yes
Direct messages	Yes	Yes	Yes
Invite / manage team members	—	—	Yes

Common Workflows

Employee — Logging your week

1. Check **Home** for tasks assigned to you.

2. Go to **Time Tracking** and start the timer when you begin work. Stop it when you finish, or log time manually.
3. At the end of the week, click **Submit Timesheet**. Your manager will review it and you will be notified of the outcome.

Employee — Submitting an expense

1. Go to **Expenses → New Expense**.
2. Enter the amount, date, and category. Upload a receipt photo if you have one.
3. Click **Submit**. Your manager is notified automatically and you will receive a notification when it is reviewed.

Employee — Requesting leave

1. Go to **Leave → New Request**.
2. Select the leave type, start date, and end date. Tick the half-day option if applicable.
3. Submit the request. Your manager is notified and you will receive a notification when it is approved or rejected.

Manager — Assigning tasks

1. Open the **Home** dashboard. The Task Pool section lists all unassigned tasks from organisation projects.
2. Click **Claim** to take a task yourself, or **Assign** to select a team member.
3. The assigned person is notified automatically and the task appears in their My Work list.

Manager — Reviewing timesheets

1. Go to **Time Tracking**. Submitted timesheets appear in the Manager review section.
2. Click **Approve** or **Reject**. If rejecting, add a note explaining what needs to be corrected.
3. The employee is notified of the decision automatically.

Owner — Billing a client

1. Go to **Invoices → New Invoice** and select the client.
2. Add line items (description, quantity, rate) and set a due date.
3. Click **Send**. The client receives a PDF by email.
4. When payment is received, open the invoice and click **Mark as Paid**.

Owner — Inviting a new team member

1. Go to **Settings → Team Members → Invite Member**.
2. Enter the person's email address and select their role (Manager or Employee).
3. They receive an email with a secure link. Once they sign up through that link, they are added to the organisation automatically.
